

CASE NO: 8207 C/D FIBROID

DR.NAMBIAR'S ULTRASOUND SCAN CENTRE

KARUNA,CHITTOORROAD, KOCHI 16

Ph: 364623/352833

PATIENT'S NAME : Mrs.GRACY GEORGE

December 13, 1999

Consultant : Dr. AGNES GEORGE

Many thanks for the referral.

REPORT

Ultrasound study of the pelvis and abdomen

Uterus : measures about 7.5x4.8cms in diameter. Uterus is bulky. Endometrial lining is within normal limits. A diffuse irregular low echogenic solid mass seen in the posterior wall of the uterus in the body and lower segment, measuring about 2.7x2.6cms in diameter. No mass lesion seen in the adnexa. Cervix is normal.

Ovaries : Normal

Tubes : No abnormal thickening or dilatation noted.

No fluid is seen in the cul-de-sac.

Urinary bladder : Normal lumen and walls.

Liver, Gall bladder, pancreas, spleen and kidneys - Normal

IVC,AORTA,PV : Normal in position and calibre.

No retroperitoneal lymphadenopathy or ascites seen.

G.I.Tract: No abnormal thickening seen in the walls of the visible bowel loops.

IMPRESSION :

1. Bulky uterus showing a diffuse irregular low echogenic solid mass in the posterior wall of the uterus in the body and lower segment, measuring about 2.7x2.6cms in diameter - intramural fibroid.

2. No space occupying lesion in the abdomen.
3. No stone or mass lesion in the K.U.S.

Suggest clinical correlation.
