

PATIENT'S NAME : Mrs. LEELA

27-1-1998

Consultant : Dr. S. KRISHNAKUMAR

Many thanks for the referral.

REPORT

Ultrasound study of the pelvis and abdomen (T.A & T.V. Scan)

Uterus : measures about 7.1x4.5cms in diameter. Uterus is bulky. Endometrial lining is within normal limits. Uterine cavity is minimally dilated. 3 irregular low echogenic solid areas are seen in the uterine walls, in the fundus and body, each measuring about 1.6x1.5cms in diameter. No mass lesion seen in the adnexa. Cervix is normal

Ovaries : normal.

Tubes No abnormal thickening or dilatation noted.

No fluid is seen in the cul-de-sac..

Urinary bladder : Normal lumen and walls.

Liver, Gall bladder, pancreas, spleen and kidneys - Normal

IVC, AORTA, PV : Normal in position and calibre.

No retroperitoneal lymphadenopathy or ascites seen.

G.I. Tract: No abnormal thickening seen in the walls of the visible bowel loops.

IMPRESSION :

1. Bulky uterus showing 3 irregular low echogenic solid areas in the uterine walls, in the fundus and body, each measuring about 1.6x1.5cms in diameter - intramural fibroids.
2. Dilated uterine cavity - due to fluid inside - inflammation.
3. No space occupying lesion in the abdomen.

Suggest clinical correlation.

Dr. DAMODARAN NAMBIAR, MD, DMRD.
(Consultant Radiologist)

3 fibroids in the walls, fundus and body of uterus
each measuring about (1.6 x 1.5 cm)

REPORT

Ultrasound study of the uterus and adnexa

Uterus : measures about 7x3.6cms in diameter. Uterus is normal in size and shape. Endometrial lining is within normal limits. No mass lesion seen in the uterus or adnexa. Cervix is normal

Ovaries : Normal.

Tubes : No abnormal thickening or dilatation seen.

No fluid is seen in the cul-de-sac..

Urinary bladder : Normal lumen and walls.

IMPRESSION :

No space occupying lesion in the uterus or adnexa .

Suggest clinical correlation .

Dr. DAMODARAN NAMBIAR, MD, DHRD.
(Consultant Radiologist)

*After 8 months treatment with Homeopathic
Medicines I advised her to take another
Scan of uterus. ~~But still the~~
which showed no space occupying lesion in the uterus
or adnexa. Completely cured fibroids.*
