ULTRASOUND, ECHOCARDIOGRAPHY & WHOLE BODY COLOUR DOPPLER SCAN

Machines used:

HIGH QUALITY SCAN WITH COLOUR DOPPLER - HDI-3500-ATL

PROBES 1) 2-4 MHZ MICROCONVEX. 2) 2-5 MHZ CONVEX.  
3) 4-7 MHZ LINEAR 4) 5-12 MHZ LINEAR  
5) 5-9 MHZ T.V. 6) 5-9 MHZ TR.RECTAL

MEDIUM QUALITY - L&T SIGMA 1AC

PROBES - 1) LINEAR 3.5 MHZ. 2) SECTOR 3.5 MHZ  
3) T.V.-7.5 MHZ

URINARY - THOSHIBA - 32B - LINEAR 2-5 MHZ

"Higher the quality, reporting accuracy more"

PATIENT'S NAME : Mrs. AYSHA

October 12, 2002

Consultant : Dr. S.KRISHNAKUMAR

Many thanks for the referral.

REPORT

Ultrasound study of the uterus and adnexa

Uterus : measures about 7x3.3cms in diametre. Uterus is normal in size and shape. Endometrial lining is within normal limits. No mass lesion seen in the uterus or adnexa.

Cervix is normal

Ovaries : Normal. Right ovary measures about 3.5x3cms in diametre and the left ovary about 2.5x2.8cms in diametre. 2 cystic areas are seen in the right ovary, varying in size from 1.6 to 1.5cms.

Tubes No abnormal thickening or dilatation noted.

No fluid is seen in the cul-de-sac.

Urinary bladder : Normal lumen and walls.

/ 70

IMPRESSION :

1. No space occupying lesion in the uterus or adnexa.
2. 2 cystic areas in the right ovary, varying in size from 1.6 to 1.5 cms - follicles.

Suggest clinical correlation.
