NAME: MRS. JAMEELA AGE: 49 YRS DATE: 18-04-2005
REF BY: Dr. RAJAMANI LALJEE, MD DGO
THANKS FOR THE REFERENCE.

SONOGRAPHY OF ABDOMEN & PELVIS

Liver is normal (12.1cm) in size with normal parenchymal appearance. No focal mass seen. Portal vein measures 12mm, appear normal. No dilated intrahepatic biliary radicles or porto-systemic collaterals seen. Hepatic veins and IVC appear normal. No pleural effusion seen.

Gallbladder is physiologically distended, has normal wall thickness. No mass seen. Common bile duct measures 1.4mm. No tenderness seen in GB region.

Pancreas appear normal in size with normal appearance. No focal mass seen. Pancreatic duct appear normal. No ductal calculi seen.

Spleen measures 9.8cm (normal). No focal mass seen. Splenic vein appear normal.

Both kidneys are normal in shape and position. Right kidney measures 10.2cm x 4.1cm. No hydronephrosis or ureteric dilatation seen.

Left kidney measures 10.9cm x 5cm. No hydronephrosis or ureteric dilatation seen. Cortical echogenicity, thickness and cortico-medullary differentiation appear normal. No ureteric dilatation seen.

Urinary bladder is well distended. No calculus, mass or diverticulum seen. No ascites seen. No fluid collection or abnormally dilated fluid filled bowel loops seen in right iliac fossa. Excessive bowel gas seen.

Uterus is mildly enlarged retroflexed measures 8.3cm x 5.4cm (shows three intramural fibroids in the fundal and posterior wall measuring 2-4cms). Restricted uterine mobility with bilateral adnexal tenderness, suggestive of PID noted. Perimenopausal status of ovaries. No adnexal or ovarian mass seen. No fluid seen in the cul-de-sac.

IMPRESSION:

Normal ultrasound study of upper abdomen and KUB.

No fluid collection or abnormally dilated fluid filled bowel loops seen.

Retroflexed uterus with three intramural fibroids, restricted mobility and bilateral adnexal tenderness, suggestive of PID

Suggest clinical correlation.

GYNAECOLOGICAL SONOGRAPHY

L.M.P : 03/05/2006

URINARY BLADDER : Is well distended.
Normal wall thickness.
No calculi/floating particles.

UTERUS : Retroverted and enlarged.
Measures 9.4 x 5.3 x 7.9 cms.

Endometrium : 23 mm in the fundal region.

Myometrium : echotexture is coarse.

Cervix : A Nabothian cyst of 7 mm is noted.

RIGHT OVARY : 2.3 x 2.1 cms.
Normal echotexture.
No focal lesions/cysts.

LEFT OVARY : 2.2 x 2 cms.
Normal echotexture.
No focal lesions/cysts.

Moderate amount of free fluid present in the pouch of Douglas.

Screening of solid abdominal organs was normal.

IMPRESSION

- BULKY UTERUS WITH COARSE MYOMETRIUM - SUGGESTIVE OF ADENOMYOSIS.
- ENDOMETRIAL HYPERPLASIA.
- CHRONIC CERVICITIS.
- SUGGESTED CLINICAL CORRELATION.

DR. JAMBHANCE P. B. MBBS
RADIOLOGIST

NO FIBROID.
