ULTRA SOUND SCAN OF ABDOMEN

LMP=31/02/06

Liver: Normal in size and echogenecity. No focal lesions seen. Intrahepatic biliary radicles are normal. Portal vein and common duct are normal.

Gall bladder: well distended and appear normal. No obvious intraluminal pathology noted. CBD is not dilated.

Pancreas: is normal in size and echotexture. No calcifications or any focal lesion seen.

Spleen: appears normal in size and with normal echotexture. Splenic hilum appears normal.

Kidneys:

Both kidneys are normal in size and echopattern. Cortico medullary distinction is maintained. No calculi or hydronephrosis seen on both sides.

Urinary Bladder well distended and appear normal.

Uterus appear normal sized, midposition measuring 7.1 x 3.3 x 4.2 cms. Myometrium appear normal. Endometrial echoes measure 8 mm. Cervix appear normal.

Right ovary measures 4.0 x 1.6 cms. Small follicles are noted in it.

Left ovary measures 4.5 x 3cms. Small cyst measuring 2.9 x 1.7 cms noted in the left ovary. Fine internal choes are noted in it. (cyst with internal bleed).

Aorta and IVC are normal. No paraaortic or iliac nodes seen.
No free fluid seen in the culdesac.

IMPRESSION

Normal upper abdominal sonography

Uterus appear normal.

Left ovary show a small cyst with internal bleed (?functional cyst)

Suggest: clinical correlation

Shall review in next cycle
